### WOODRUFF'S BEAUTY SILO CORN

The most profitable corn that goes into the silo. Grows 10 to 14 feet. Early and matures its rich golden ears even in Northern New England. From a few bushels of seed first put out by us in 1923, our dairymen of the East now require from us many thousands of bushels annually. Per bu. \$3.00.

Dec. 14

S. D. Woodruff & Sons,  
Orange, Conn.,  
Gentlemen:

The above is a photograph of WOODRUFF'S SELECTED BEAUTY ENSILAGE CORN on the Holy Cross College Farm of Worcester, Mass. It was exactly 95 days from planting to cutting. The germination was practically 100%, grew on an average of 12 ft. high and 75% of the stalks had two ears which measured on an average of 18 inches long. The ears were filled and fully matured for silo.
